

Assessment for Greece (Megalopolis)

Status: Final Plan

Date of plan: 28.11.2022

Overall Plan Rating

There are also some indicators rated as not consistent with the just transition. These are marked as red on the traffic light system and should be the foremost priorities to address and improve on. The indicators are organised under their corresponding principles in the Annex to this report.

Performance of TJTP by principle

Principle 1: The TJTP should be sustainable and deliver on long-term, international and EU climate commitments such as the Paris Agreement and EU 2030 and 2050 climate objectives.

Principle 2: The TJTP should not lead to prolonged fossil fuel use or promote false solutions to the transition to climate neutrality. As a guide, coal should be phased out by 2030.

Principle 3: The TJTP should lead to sustainable economic diversification at the local, regional and national level.

Principle 4: The TJTP should address social inequalities, improve interregional solidarity, decrease inequalities and tackle injustices.

Principle 5: The TJTP should not harm EU environmental and climate objectives and values.

Principle 6: The TJTP should respect the polluter pays principle.

Principle 7: The TJTP should be supported by adequate, coordinated and long-term public and private funding sources.

Principle 8: The TJTP should be designed, monitored and evaluated through meaningful partnerships which engage all stakeholders in an open, inclusive and ongoing process, especially at local level. Social dialogue and collective bargaining should be central pillars of the transition when it comes to the labour market and enterprises.

Principle 9: The TJTP should take a place-based, local approach to strategy design and implementation.

Principle 10: The TJTP should be developed based on high quality, independent and objective analysis of the challenges and opportunities of the transition for regions.

Breakdown by indicator

Principle 1

The TJTP should be sustainable and deliver on long-term, international and EU climate commitments such as the Paris Agreement and EU 2030 and 2050 climate objectives.

Indicates a commitment to at least a 55% GHG emissions reduction versus 1990 level by 2030 at regional or national level

✔ The plan will be revised to take into account the updated EU 2030 target

Identifies the opportunities to increase renewable energy in the region or nationally, but no specific actions, projects or targets are proposed

Comments: see 2.4.1.2

Identifies the opportunities to increase energy efficiency or reduce energy use in the region or nationally, but no specific actions, projects or targets are proposed

Principle 2

The TJTP should not lead to prolonged fossil fuel use or promote false solutions to the transition to climate neutrality. As a guide, coal should be phased out by 2030.

A complete phase-out of coal is planned or implied in the territory by 2030

No phase-out of fossil gas is planned or implied

Not enough information available or fossil fuel subsidies not discussed

Principle 3

The TJTP should lead to sustainable economic diversification at the local, regional and national level.

Promotes economic diversification, and explicitly recognises (e.g. in the assessment of the transition challenges) that all sectors of the economy must become sustainable

Recognises the value of SMEs and start-ups for economic diversification, but does not set out clearly how it will provide support to develop and incentivise them

Indicates a link to and a need for consistency with the NECP, but does not clearly link investments for sustainable economic diversification and decent job creation to it

Principle 4

The TJTP should address social inequalities, improve interregional solidarity, decrease inequalities and tackle injustices.

Justifies why certain regions should receive support with reference to the underlying economic and employment impacts of the transition, and justifies the choice objective criteria or comparative data

Prioritises employment support and job search assistance for workers directly losing their jobs as a result of the transition AND other worker groups, including those who may be indirectly affected

Identifies some of the existing and future skills, training and education gaps at regional level on the basis of objective and quality skills forecasts, or sets out a process to identify them - but focuses on a limited range of sectors or only on workers directly affected by the transition or who have already lost their jobs

Foresees only insignificant or non-specific actions and investments to address these gaps and ensure sufficient and decent, sustainable and resilient jobs, or focuses only on reskilling workers directly affected by the transition

Recognises the risk that new jobs created don't offer the same quality or wages as jobs in declining industries and the need to include measures to tackle this, but doesn't consider all factors of decent work, such as access to collective bargaining, or safe, healthy working conditions and reasonable working hours

- Recognises some inequalities and identifies some measures to address those arising from the transition, such as a minimum income support, energy poverty reduction or early pensions. But the TJTP does not consider existing inequalities or address all inequalities identified with planned measures
- Identifies the potential changes to quality of life arising from the transition and includes some targeted measures to address residual negative factors, such as air and water quality issues
- includes provisions to actively support gender equality, including equality of opportunity for women and the inclusion of women in the labour market

● Principle 5

The TJTP should not harm EU environmental and climate objectives and values.

- Does not include activities which would negatively impact environmental and biodiversity indicators relating to:
 - Biodiversity
 - Air pollution
 - Accessible greenspace (land take)
 - Water quality

AND neither does it include significantly harmful activities as defined by the EU Taxonomy or which would lead to unsustainable use of natural resources or which would lead to ecosystem harm

- Foresees no investments in infrastructure which could directly or indirectly lead to greater greenhouse gas emissions
- Identifies actions or activities to improve a wide range of environment and biodiversity indicators in the regions concerned. It includes, as a minimum, actions or activities relating to at least 3 of the following categories:
 - Biodiversity
 - Air pollution
 - Accessible greenspace (land take)
 - Water quality
- Foresees no new investment in waste incineration or landfill capacity.
AND
Includes or prioritises new activities which would favour a circular, rather than a linear economy and which will not increase greenhouse gas emissions.

● Principle 6

The TJTP should respect the polluter pays principle.

- The TJTP identifies - or commits to identify - the entities responsible for existing environmental damage, but does not establish how the Polluter Pays Principle will be respected when making investment decisions

● Principle 7

The TJTP should be supported by adequate, coordinated and long-term public and private funding sources.

- EU funds and national public funds are identified to support the just transition: other sources of public funding than the Just Transition Fund and the Pillar III of the Just Transition Mechanism are identified, including national sources. Funding sources are targeted to the most appropriate activities or to address funding gaps
- Private funding sources are identified alongside public funding sources, with an indication of how private funds may be leveraged, mainly or exclusively relying on Pillar II of the Just Transition Mechanism

● Principle 8

The TJTP should be designed, monitored and evaluated through meaningful partnerships which engage all stakeholders in an open, inclusive and ongoing process, especially at local level. Social dialogue and collective bargaining should be central pillars of the transition when it comes to the labour market and enterprises.

- A coordination body is established but membership of the coordination body requirements and composition may be unclear.

AND / OR

Details on procedures are vague without transparency on timing and schedules for such meetings, or on how, when or where information on process and relevant documents will be published in an accessible place. Alternatively the majority of information must be directly requested from the institution responsible rather than openly available.

- Includes no identification of stakeholders, their roles and status in the process

OR

Includes an incomplete identification of stakeholders, missing key groups and which is inconsistent with the comprehensive list identified in Article 3 of the European Code of Conduct on Partnership, even if roles and status of the stakeholders identified in the process are indicated

- Limited detail on how stakeholder views and consultation inputs were integrated into the final plan, or how they will be (beyond a commitment to a consultation, for example). Detail on stakeholder engagement plans for the preparation, implementation, monitoring and evaluation of the TJTP is also limited.

- ✓ The plan recognises the need to support capacity building of some stakeholders, particularly those with limited resources, to enhance their engagement

- Public consultation and engagement of all stakeholders while all options are open is provided for, but the period of consultation and engagement is launched with less than 4 weeks prior notice

AND/OR

The period for consultation and engagement lasts for less than 12 weeks

AND/OR

There is less than 4 weeks to comment on the final draft

AND/OR

Not all relevant stakeholders have been given the opportunity to participate in a public consultation.

- Social dialogue is not a part of the planning process, or is mentioned only passively. Labour unions and social partners have not been engaged in social dialogue during the development of the TJTP.

● Principle 9

The TJTP should take a place-based, local approach to strategy design and implementation.

- Identifies NUTS 3 regions which will require targeted action and prioritises measures for the specific NUTS 3 regions concerned

- Notes the need for community engagement and acknowledges existing or planned community initiatives, but does not indicate how these will be integrated into the TJTP or how the community will be engaged and informed

● Principle 10

The TJTP should be developed based on high quality, independent and objective analysis of the challenges and opportunities of the transition for regions.

- The indicators and/or data included in the TJTP are focused at the regional level and are high quality, appropriate to the goals of the fund to address the socioeconomic challenges arising from the transition to climate neutrality and they are comprehensive, encompassing both quantitative and qualitative measures

- The TJTP foresees a revision process by the Member State but the process is vague, for example it does not include a date, or an evaluation of implementation so far
